Data Flow Diagram

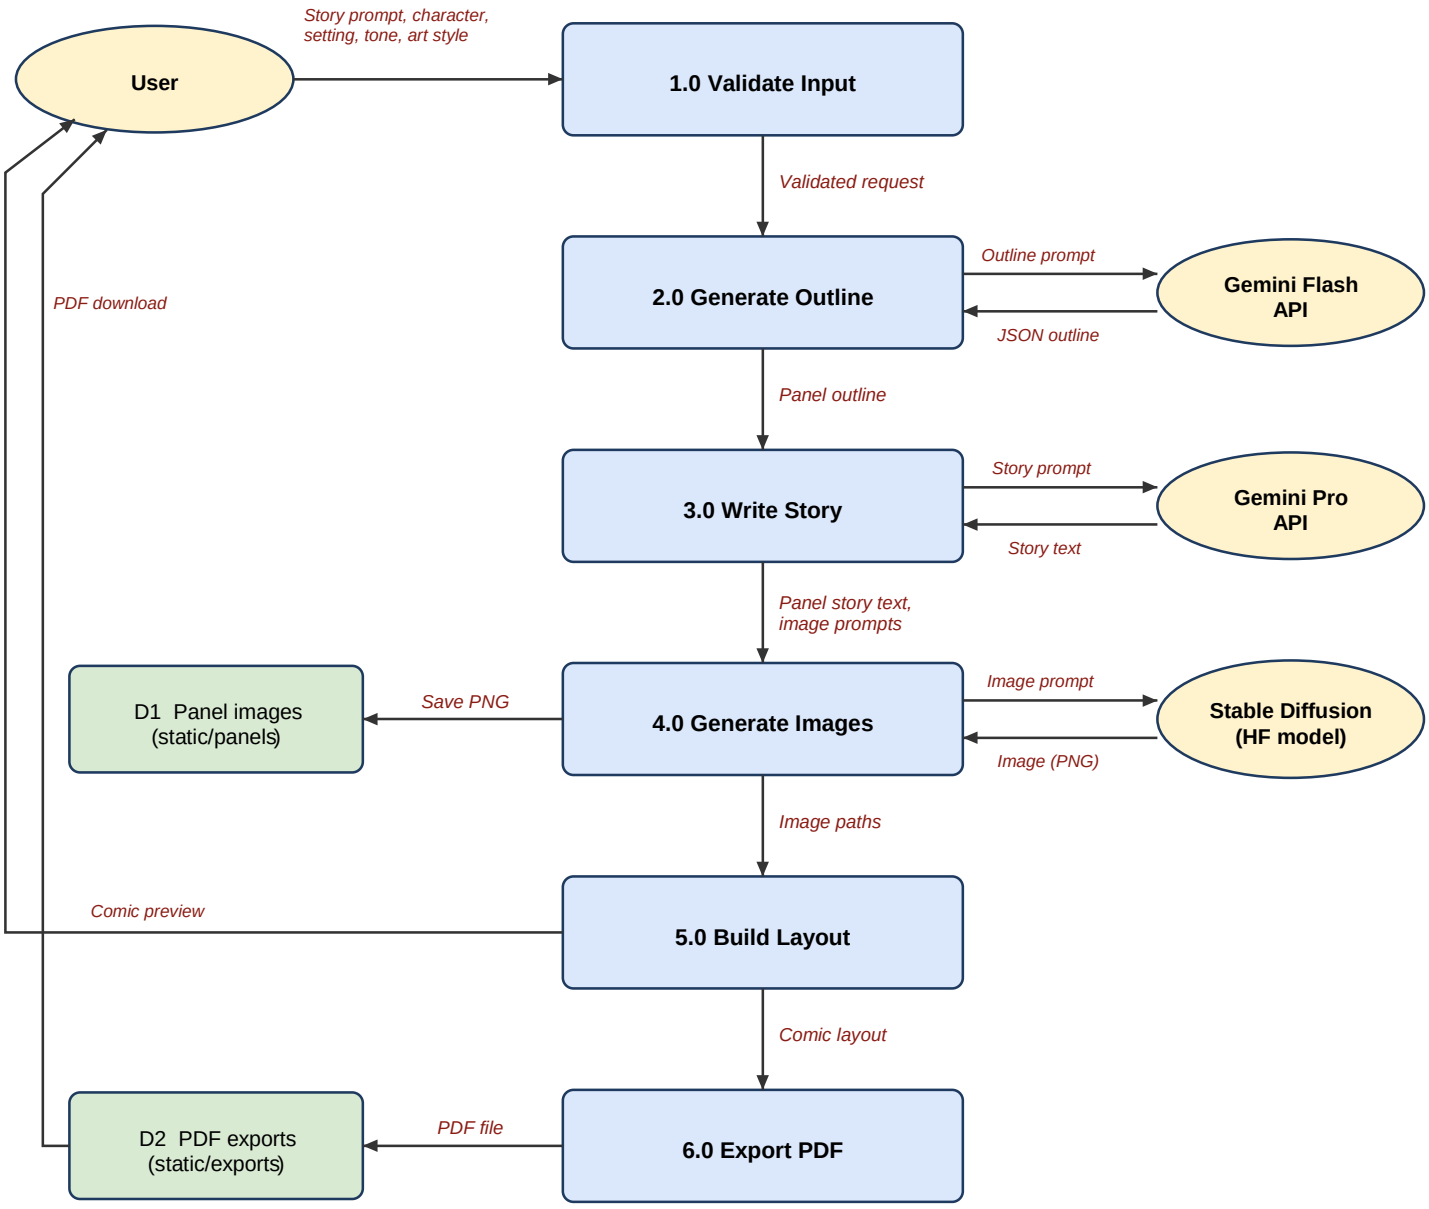

Date	30 September 2026
Team ID	3
Project Name	ComicCraft - AI Comic Story Creator using Gemini Models

The DFD shows how data moves between the external entities (User, Gemini API, Stable Diffusion model), the numbered processes inside ComicCraft and its data stores.

DFD Symbol Legend

Symbol	Name	Description
Oval	External Entity	Person or system outside ComicCraft (User, Gemini API, Stable Diffusion model).
Rectangle with number	Process	Activity that transforms input data into output data (1.0 - 6.0).
Shaded rectangle	Data Store	Where data is kept: D1 panel images, D2 exported PDFs.
Labeled arrow	Data Flow	Data moving between entities, processes and stores.

Level-1 Data Flow Diagram: ComicCraft

Flow	From -> To	Data
F1	User -> 1.0	Story prompt, character name, setting, tone, art style (HTML form or JSON)

F2	1.0 -> 2.0 -> Gemini Flash	Validated PromptRequest; returns 5-panel JSON outline
F3	2.0 -> 3.0 -> Gemini Pro	Outline text; returns narration and dialogue for every panel

Data flow description

Flow	From -> To	Data
F4	3.0 -> 4.0 -> Stable Diffusion -> D1	Image prompts; returns PNG images stored in static/panels
F5	4.0 -> 5.0 -> 6.0 -> D2	Image paths + story text matched into a layout, then exported as a timestamped PDF
F6	5.0 / D2 -> User	Comic preview page and PDF download
